

Global challenges.
Turkish solutions.

1 billion people are living in areas with extreme water stress.

3 billion, or 40% of the population, in 2020.

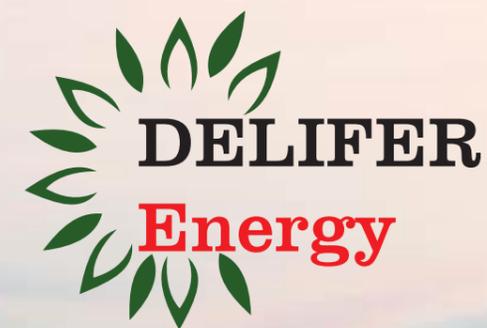

We are only using
a fraction of the water
coming out of the tap.

Literally millions of
ton of water straight
down the drain.

Water saving redefined.

Sprinkler – the key to extreme saving without loss of functionality.

In a normal faucet, water gushes out, and most of it just runs through your hands or bounces off your plates. In the end, you only used the water that touched your skin. That's billions of tons of clean water flowing directly into sewers every day.

With our patented sprinkler technology, we turn water into a dense mist that comes out of your faucet. Dividing water into millions of drops greatly increases the surface area of the water. make it possible to use every drop that comes out of your faucet.

So you get all the water you need while saving up to 80%.

Turn your regular tap into a water saving genius.

Our super simple installation and retrofit solution makes it possible to replace taps in minutes. Upgrade your existing high-flow faucets to modern, ultra-efficient ones. It is made of the highest quality bio plastic and is designed to integrate seamlessly with your faucet and your life.

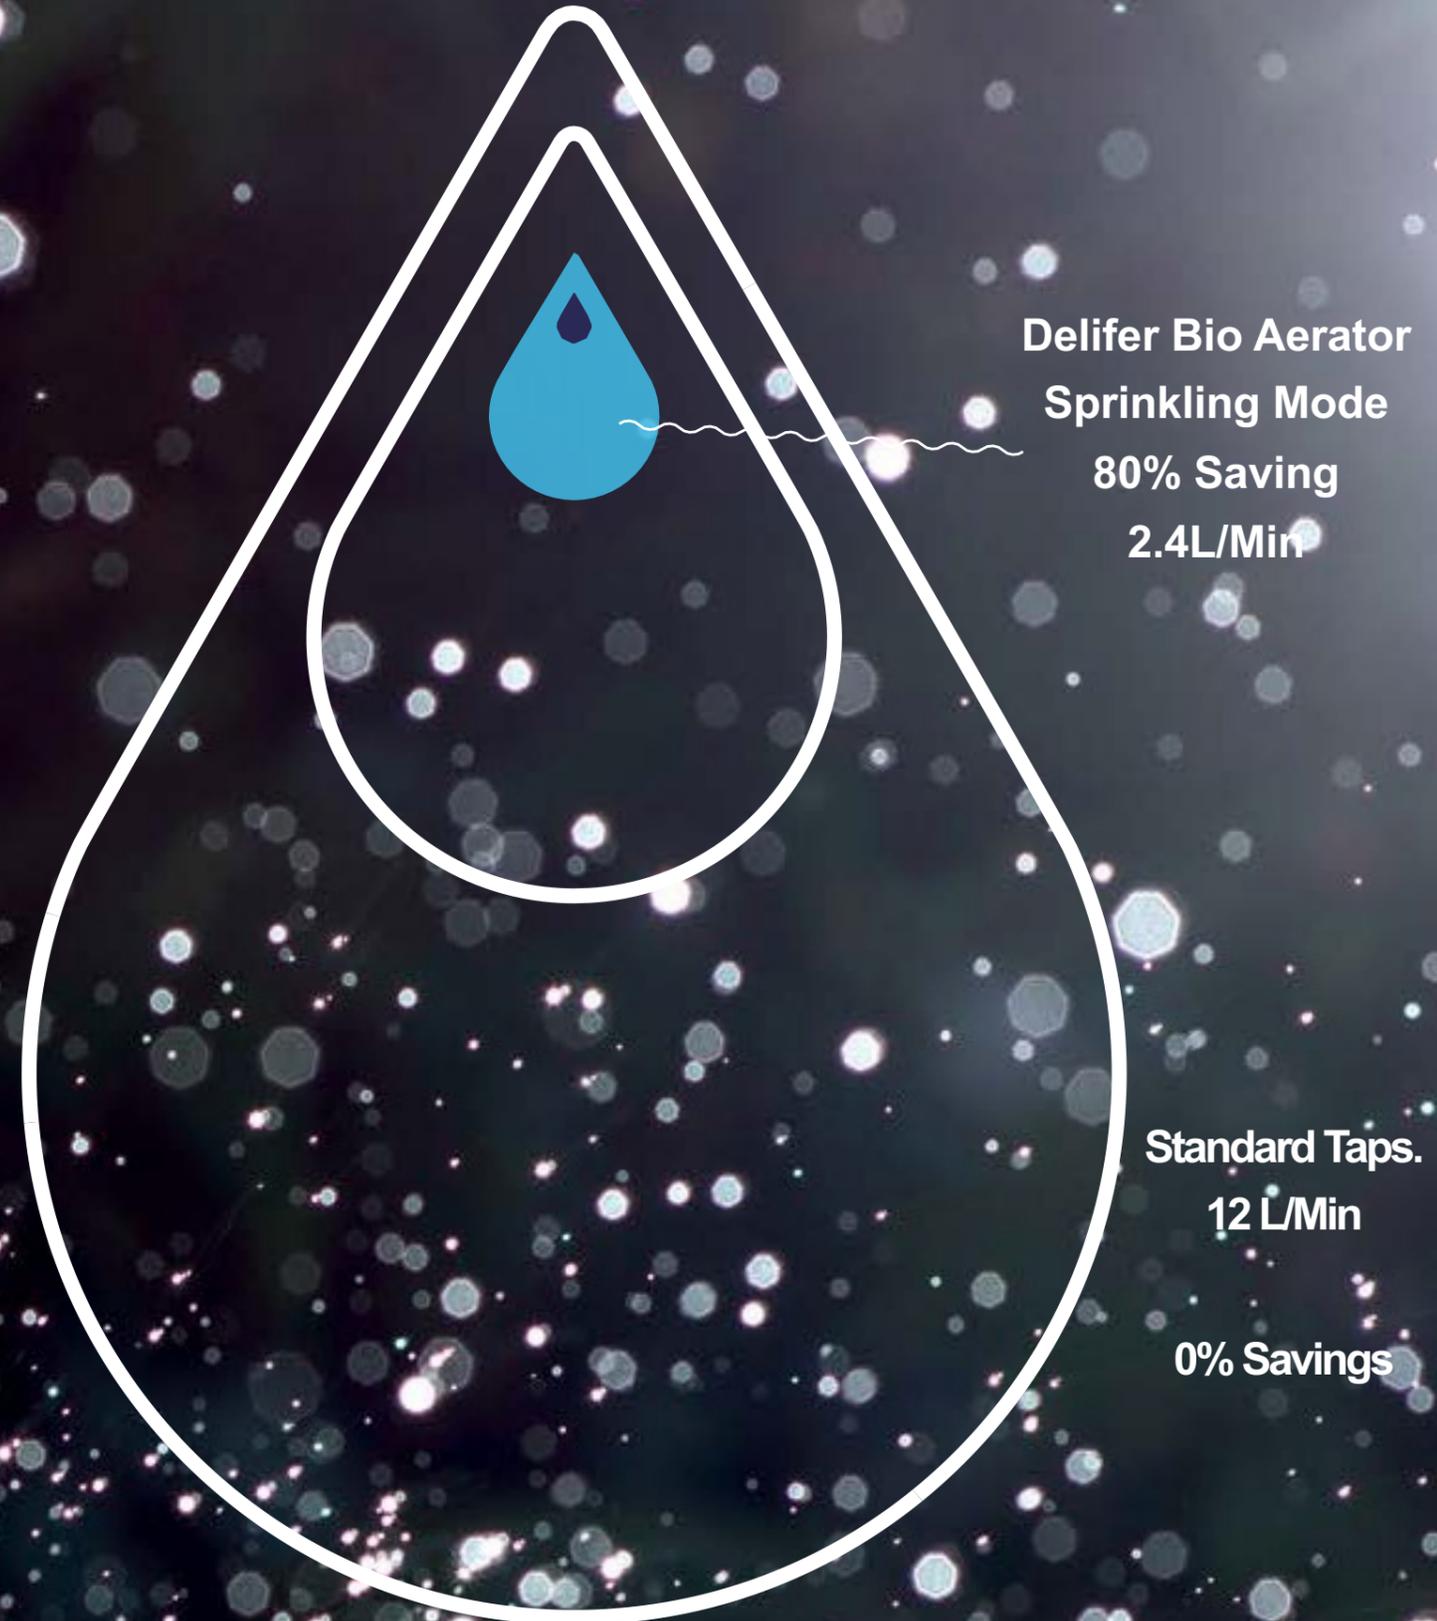

Savings guaranteed

Even when compared to the most extreme water-saving fixtures, Delifer bio plastic products use up to 80% less water by sprinkling.

Our product range is the most extreme water-saving aerator in the world. It still saves up to 80% compared to regular faucets you know the savings are guaranteed. Using less water also means using less energy to heat the water. And it's not just good for planet earth.

All this means lower costs. You'll save more than 80% for common areas with the Delifer bio aerator we've seen.

Basically, the Delifer savings aerator pays for itself in a few months.

Technical Specifications & Warranty

Consumption amount in 1 minute

Warranty

If you are not satisfied with the product or if the product is defective, take the product to the place of purchase. As a customer you must be able to confirm the time of purchase by presenting a receipt or a copy of the invoice for the delivery of the product in question. Delifer products are under warranty for two (2) years from the date of purchase. The warranty applies only if the aerator has been correctly installed and used.

The warranty does not cover damage from freezing or damage and functional defects arising from impurities in the water. Nor does the warranty apply for defects caused by improper cleaning (scrubbing or use of abrasive/corrosive cleansers). Defects from normal product wear, faulty installation, incorrect use, or failure to follow installation and service instructions shall not be compensated. The warranty does not cover costs for third

parties or for any costs other than for the delivered product. Damages caused by stress corrosion as a result of water conditions or the surrounding environment, or because of faulty installation, shall not be included in product liability.

Cleaning and maintenance

Use a soft, damp cloth and a small amount of dishwashing liquid for daily cleaning or when needed. Never use abrasives, steel wool, or harsh cleansers (for example, for lime deposit removal or polishing, alkaline cleansers, or cleansers containing alcohol). Rinse with water and dry/polish with a

clean, dry cloth. If there are lime

deposits on the aerator, use a small amount of vinegar diluted with water to gently remove them. Rinse afterward using only water.

Installation must be performed in accordance with all applicable local regulations for building/construction and for water systems. If you are unsure, contact a professional. In all water systems, it is very important to ensure that hot and cold water maintain the correct temperatures and that the systems and its components have been correctly installed.
